Fun Facts:

- Some devices now use finger print or face recognition for a password which makes it harder for them to hack.
- Many people use the same password for all their devices, this is not a good idea.
- An avatar doesn't need to look like you, it can be anything such as a monster or unicorn.
- You will need to learn how to open save and print to help you when you get older as many jobs will need you to do this.
- A password can be a combination of different letters and numbers.
