

Y5/6 – What web page can you create?

What is a website?

A website is a collection of information relating to a particular topic that can be accessed on a range of devices.

What is a browser?

A browser allows you to navigate or find your way around the World Wide Web.

A browser shows you what a website looks like.

What's the purpose of your web page?

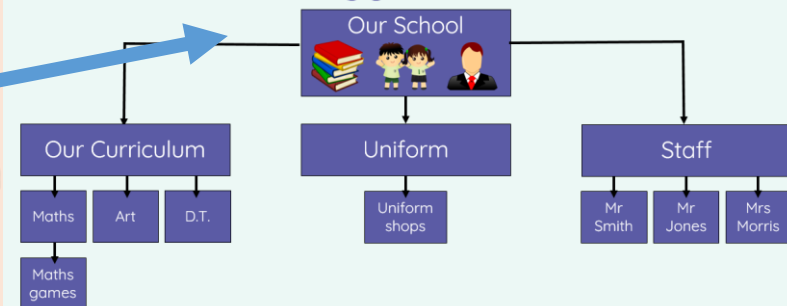

Copyright

If you want to use someone else's work you should:

- Ask permission
- Give credit to the person who made it
- Buy it – if it has a cost attached (e.g. from an online resource library)

Planning your website

HTML	Hypertext Markup Language , a standardised system for tagging text files to achieve font, colour, graphic, and hyperlink effects on World Wide Web pages.
Hyperlink	A link from a hypertext document to another location, activated by clicking on a highlighted word or image.
Web link	A web link is the words/letters/numbers in the top bar on any website, located in the URL bar.
URL	URL stands for Uniform Resource Locator . A URL is nothing more than the address of a given unique resource on the Web.
